# Federal Milk Order Market Statistics for November 1981

### Highlights

- Minimum Class I Price, \$14.60 Blend, \$13.70
- Producer Deliveries up 5.2 Percent
- Producer Milk Used in Class I-Down 0.4 Percent
- 49 Percent of Deliveries Used in Class I
- In-Area Fluid Sales (Adjusted)-Down 1.5 Percent

**Special This Issue** 

Per Capita Sales of Fluid Milk Products in Federal Order Markets

### TABLE OF CONTENTS

1/ Represents changes over the previous year. Percentages computed from unrounded numbers. Data for 1976 and 1980 adjusted to a 365-day basis before computing percent changes.
2/ Based on comparable markets--orders which were effective entire period, 1980-81, and which have had no significant marketing area changes. Excludes Southwestern Idaho-Eastern Oregon.
3/ Percentage changes for February and year to date have been adjusted for the different number of days in February 1980 and February 1981.
4/ Average or total. May not add due to rounding.

1/ In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under Sales routes of handlers may extend outside defined marketing other orders, by partially regulated handlers, and by producer-handlers. areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain and flavored whole milk 3/ Plain, solids added, flavored lowfat and skim milk, and buttermilk. 3/ Plain, solids added, flavored lowfat and skim milk, and buttermilk. 4/ Represents changes over the previous year. Percentages are based on the same number of comparable markets in both years. Data for 1980 are adjusted to a 365-day basis before computing percent changes. 5/ Excludes the New York-New Jersey market. 5/ Adjusted to eliminate variations in data due to calendar composition and seasonality. See special article in FMOS-243, March 1980 Summary.

 $\overline{8}/$  Excludes the New York-New Jersey market. Data for current month are estimated.  $\overline{8}/$  Percentage changes for February and year to date have been adjusted for the different number of days in February 1980 and February 1981.

1/ Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are listed generally for the major city in the
marketing area; see footnotes on page 24 for these locations.
2/ The basic formula price is the Minnesota-Wisconsin price for the second preceding month adjusted to a 3.5 percent butterfat
content. See Table 17.
3/ Tied to the St. Louis-Ozarks order.
4/ Tied to the Oklahoma Metropolitan order.

1/ Excludes Southeastern Florida; Class III only applies to the skim milk portion of all milk disposed of for fertilizer or livestock feed or dumped. Also excludes Lake Mead and Great Basin for which the data were restricted; and Western Colorado for which there were no producer deliveries used in Class II. Otherwise, all orders which have three classes of utilization are shown.
2/ The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Fort Smith which were restricted.

1/ Volumes include 29-day totals for February 1980. The percentage changes are based on adjusted 28-day totals for February 1980 to make them comparable to 1981.

2/ The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Fort Smith which were restricted.

3/ Based on markets where orders were effective entire period, 1980-81, and which had no significant marketing area changes.

Excludes Southwestern Idaho-Eastern Oregon.

<sup>1/</sup> In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.
2/ Plain and flavored whole milk.
3/ Plain, fortified, and flavored skim and lowfat milk, and buttermilk.
4/ Percentage changes have been adjusted for the different number of days in February 1980 and February 1981.
5/ Figures adjusted to eliminate variations due to calendar composition. See special article in FMOS-258, June 1981 Summary.

```
1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the
marketing area. All averages are weighted.
  2/ For those markets which have base-excess plans (see Table 15) the prices represent
a weighted average of the base and excess prices.
  3/ Zone 1 (Boston). Prices at 201-210 mile zone: Class I and blend are 50 cents less.
Class I price at Hartford is 11 cents less.
  4/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 59 cents
less; Class II, 8 cents less.
  5/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct
deTivery differential applicable to milk delivered to Philadelphia.
  6/ See Table 15 for 1981 deduction for advertising and promotion.
7/ Seven cents for advertising and promotion has been deducted from the blend price.
  8/ Atlanta.
  9/ Jacksonville and Tallahassee.
 10/ Miami.
 11/ Applies to the skim milk portion of all milk which is either disposed of for fertilizer
or livestock feed or dumped.
 12/ Zone 2 (Marquette).
 13/ Individual handler pool. Blend prices are weighted averages of all handlers,
1980-81.
 14/ Price excludes direct delivery differentials of 10 cents applicable to milk delivered
to Detroit.
 15/ Zone 1 (Erie, Pa.). Class I and blend price for zone 3 (Cleveland) plus 8 cents, for zone 4
(Pittsburgh) plus 10 cents.
 16/ Ten cents for advertising and promotion has been deducted from the blend price.
 17/ Nine cents for advertising and promotion has been deducted from the blend price.
 18/ Central zone (Cincinnati and Columbus). Class I and blend price at Toledo,
(Northwestern zone) 5 cents less and at Charleston, W. Va. (Southeastern zone) 5 cents more.
 19/ Indianapolis.
20/ Zone 1 (Chicago). Class I and blend price at Milwaukee (Zone 4) 9 cents less.
 21/ Peoria.
 22/ Base zone (Alton). Class I and blend price at Carbondale (Southeastern zone) 7 cents more.
 23/ Zone 1 (Minneapolis).
 24/ Sioux Falls.
 25/ Rapid City, S. Dak.
 \overline{26}/ Zone 1 (Des Moines). Class I prices at other points in the marketing area: Rock Island, Ill.,
minus 7 cents; Waterloo, minus 16 cents.
 27/ Zone 1 (Omaha).
 28/ Kansas City and Topeka.
 29/ Zone 1 (St. Louis and Springfield).
 30/ Pittsburg, Kansas.
 31/ Zone l (Wichita).
 32/ Bristol, Chattanooga, and Knoxville.
 33/ Little Rock.
 34/ Oklahoma City.
 35/ Wichita Falls, Tex.
 36/ Amarillo.
 37/ Zone 1 (Dallas). Class I price at Houston plus 36 cents.
 38/ Monroe and Shreveport.
 39/ Zone 1 (New Orleans).
 40/ Denver.
 41/ Grand Junction.
 42/ Boise, Idaho.
 43/ Salt Lake City, Utah.
 44/ Las Vegas, Nev.
 45/ Phoenix.
 46/ Albuquerque, Santa Fe, and El Paso.
 47/ District 1 (Seattle).
 48/ Spokane, Washington.
 49/ Portland.
50/ Excludes Fort Smith. Fewer than three handlers. Fort Smith prices: Class I 1981, $14.41 and 1980, $14.02; Blend 1981, $14.15 and 1980, $13.77; Class II 1981, $12.66; Class III 1981, $12.52. Producer differential 1981, 17.1¢.
 51/ Based on markets where orders were effective entire period, 1980-81, and which had no
significant marketing area changes. Excludes Southwestern Idaho-Eastern Oregon.
 52/ A weighted average price for milk in excess of Class I needs calculated as follows:
(producer deliveries used in Class II times the Class II price) plus (producer deliveries
```

used in Class III times the Class III price) divided by (total producer deliveries in excess

of Class I needs) would be \$12.56.

<sup>1/ &</sup>quot;Consumer Prices: Energy and food," BLS, U.S. Department of Labor. Regions are defined as the four census regions. According to BLS, average prices are best used to measure the price level in a particular month, not to measure price change over time. To measure change over time, the Consumer Price Index and its component indexes for individual items are more appropriate. The average food prices included in this table reflect variations in brand, quality, and size among geographic areas. BLS suggests that users of average food prices should be aware that these differences exist.

 $<sup>\</sup>frac{2}{7}$  Prices are per  $\frac{1}{2}$  gallon.  $\frac{3}{7}$  Prices are per pound for Grade AA, salted, stick butter.

<sup>4/</sup> Prices are per 1/2 gallon for prepackaged, bulk, regular.
5/ Prices are per 1/2 pint for natural, fruit flavored.

3/ May not add due to rounding.
4/ Data represent natural cheese only and do not include government holdings of processed cheese.
5/ "Dairy Products," SRS.
6/ "Summary of Processed Commodities in Store," Agricultural Stabilization and Conservation Service.

<sup>2/</sup> U.S.D.A. purchases (delivery basis) of butter, cheese, and evaporated milk, minus U.S.D.A. domestic sales for unrestricted use of butter and cheese; includes purchases under price support, Section 709, Section 32, and Section 4A programs.

<sup>3/</sup> Includes 230,955 thousand pounds purchased in 500-pounds barrels, 180,702 thousand pounds purchased as process cheese, and includes 2,967 thousand pounds purchased as 60-pounds block cheese. Does not include 11,227 thousand

pounds purchased as mozzarella cheese.  $\frac{4}{1}$  Includes 77,728 thousand pounds purchased in 500-pounds barrels, and 156,341 thousand pounds purchased as process cheese. Does not include 28,361 thousand pounds purchased as mozzarella cheese.

<sup>5/</sup> Includes 38 and 111 million pounds (milk equivalent) of evaporated milk and mozzarella cheese, respectively.

6/ Includes 38 and 280 million pounds (milk equivalent) of evaporated milk and mozzarella cheese, respectively.

## Per Capita Sales of Fluid Milk Products in Federal Order Markets\*

During 1980, per capita sales of fluid milk products in the United States totaled 243.9 pounds or about 28.4 gallons. On the average, each American consumed 143.7 pounds of plain whole milk, 73.4 pounds of lowfat milk, 12.1 pounds of skim milk, 10.5 pounds of flavored milk and drinks, and 4.3 pounds of buttermilk.1/ These are national averages. However, fluid milk use per person varies regionally because some of the more important factors affecting fluid milk consumption--retail price, disposable personal income, population makeup--vary regionally.

To shed some light on regional variation in per capita fluid milk sales, a survey was made of fluid milk sales in Federal milk order marketing areas during 1980. Sales in Federal milk order marketing areas represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Federal milk order marketing areas include most of the major urban areas of the country and consequently account for about 75 percent of the total sales in the United States. (See the map on page 8 for the location of these marketing areas.) Following are some highlights of this survey, along with some comparisons with a similar survey made for 1970.

- (1) Per capita sales of total fluid milk products show a wide regional variation. Per person use in the Pacific region was the highest, nearly 9 percent above the national average. Per person use was the lowest in the South Atlantic region, running about 14 percent below the national average. (See Table A.)
- (2) Regional consumption patterns for individual fluid milk products show even wider variations. Consumers in the North Atlantic region drank the largest amount of whole milk per person--22 percent more than the national average and 87 percent more than consumers in the West North Central region. However, per capita sales of plain lowfat milk in the West North Central region were the highest in the country--more than twice as large as in all markets combined and nearly five times larger than in the North Atlantic region. (See Table A.)
- (3) Another product with strong regional preferences is buttermilk. Consumers in the southern states, particularly in the East South Central region, drink considerably more buttermilk than do consumers in the northern states, especially in the North Atlantic region. (See Table A.)
- (4) On an individual market basis, per capita sales of total fluid milk items in 1980 ranged from 289.4 pounds (33.6 gallons) in the Iowa market, to 181.8 pounds (21.1 gallons) in the Lubbock-Plainview, Texas market. Consumers in the Oklahoma Metropolitan area drank the largest amount of whole milk items per person while consumers in the Upper Midwest market drank the largest amount of lowfat and skim milk items per person. (See Table B.)

- (5) Between 1970 and 1980, per capita sales of total fluid milk products in Federal milk order marketing areas declined about 1 percent annually. In 1980, consumers were drinking about a third less whole milk, more than twice as much lowfat milk, about the same skim milk, nearly three times as much flavored milk drinks, and about a quarter less buttermilk than in 1970. However, whole milk remains the most widely consumed fluid milk product with per capita use in 1980 about twice as large as per capita use of lowfat milk. (See Table C.)
- (6) Total fluid milk sales per person declined in all regions during the 1970's, although there were considerable differences in changes among the various regions. Per capita fluid use decreased the least in the Mountain and Pacific regions--with sales down only 2 and 3 percent respectively, from 1970 to 1980. On the other hand, fluid sales declined 11 percent in the East North Central region and almost 10 percent in the North Atlantic region--the largest declines in the 1970 to 1980 period. Lowfat and skim milk sales per capita rose in each region from 1970 to 1980, while consumers bought less whole milk products.

\*Prepared by John P. Rourke, agricultural marketing specialist, and Vergie Hughes, economics assistant, Market Information Branch, Dairy Division, Agricultural Marketing Service, FMOS-263, November 1981 Summary.

1/ USDA, Dairy Outlook and Situation, ESS, DS-385, June 1981, page 22.

## MAJOR ORDER ACTIONS, NOVEMBER 1981

## **Suspension:**

Nashville - November 30 (46 FR 58064). This action suspends for the months of November 1981 through January 1982, the requirement that a distribution plant must dispose of at least 50 percent of its milk receipts as route disposition to qualify as a pool plant.

## Amendment:

Upper Florida, Tampa Bay, and Southeastern Florida - November 1 (46 FR 51234). The classification of skim milk and butterfat disposed of in eggnog is changed from Class I milk to Class II milk under each of the three orders.
